FOR IMMEDIATE RELEASE

**“Infotegrity helps implement Badger Technologies new system in 100 days; strategic partnership signed.”**

Infotegrity, LLC, formed a long term business partnership with Badger Technologies, Inc., to provide strategic and tactical support services for Badger’s Information Technology (IT) and Oracle E-Business Suite operations. The partnership agreement enables Badger to focus full attention and assets on their core business, contract manufacturing, and they will look to Infotegrity to help manage IT systems and related support functions. Badger previously selected Infotegrity in 2005 as their implementation partner, planning to better manage manufacturing and financial operations once installed and functional on Oracle’s Release 11i.

Infotegrity Managing Partner, Scott Thon, cited “Infotegrity’s best practices approach, highly skilled professionals, and a commitment to teamwork and client satisfaction as contributing factors in Badger’s partnership decision and implementation success. Infotegrity directed Badger’s migration to the Oracle E-Business Suite and, in less than 100 days, implemented twelve (12) manufacturing, financial and order management application modules as well as enhanced business processes and policies. Thon added, “Infotegrity’s professional staff, bundled service offerings, and proven best practices and methodologies continue to deliver accelerated ROI solutions that clients like Badger require to progress strategic business, technology and operations initiatives”.

Badger President, Rick Cirincione, recognized Badger’s critical need to enhance operational efficiency by implementing Oracle’s E-Business Suite. Cirincione said “Oracle’s integrated application platform, Release 11i, is strategic to Badger’s continuous improvement, ongoing success and future expansion as a contract manufacturing firm. Infotegrity’s goals were challenging but straightforward: progress this initiative, get us converted, implemented and trained over the first 100 days, and then remain with us as a strategic business partner well into the future. Mission accomplished!”

Infotegrity, located at Powder Mill Office Park in Pittsford, NY, is an accomplished Oracle partner and trusted business advisor that delivers high value, enhanced ROI solutions to small and mid-size companies and divisions of Fortune 1000 businesses.

Badger Technologies, Inc., is a contract manufacturing and services firm with facilities in Farmington and Penn Yan, New York, and can be visited at [www.badgertech.com](http://www.badgertech.com) via the internet.
